# Weekly Coal Production

Production for Week Ended:  
July 10, 1982

Released for Printing:  
July 16, 1982

Energy Information  
Administration  
Office of Coal, Nuclear,  
Electric, and Alternate Fuels  
**U.S. Department of Energy**

### Highlights

Production of bituminous coal and lignite in the week ended July 10, 1982, as estimated by the Energy Information Administration, was 8,733,000 short tons, 38.8 percent below the corresponding week a year ago. The sharp decline in production during the last two weeks compared with this period last year occurred because in 1981 many miners elected to work through vacation periods after having just ended the lengthy United Mine Workers' strike. Bituminous coal and lignite production from January 1 through July 10, 1982 totaled 447,470,000 short tons, up 20.4 percent from production in 1981.

Production of Pennsylvania anthracite in the week ended July 10, 1982, as estimated by the Energy Information Administration, was 66,000 short tons, 34.0 percent below the corresponding week a year ago. Anthracite production from January 1 through July 10, 1982 totaled 3,327,000 short tons, up 18.8 percent from production in 1981.

*Weekly Coal Production* provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports and exports, and related supply and demand data are provided as they become available.

*Weekly Coal Production* is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.
